Falls data: the figures given here are taken from Hospital Episode Statistics data, which takes the number of those aged 65 or over being admitted to hospital on a non-elective basis at least once in each year as a result of a fall and divides it by the number of those of that age group resident in each ward to give a rate per 1,000 population.

Adult Social Care

Social isolation

Social isolation: This is based on respondents to two questions on the Adult Social Care Survey regarding social contact and how time is spent.
A score of 1 indicates that the respondent has plenty of social contact and that they spend their time doing things they enjoy
A score of 4 indicates that the respondent feels socially isolated and that they don't feel they do anything of value with their time.

The mean of all respondents' responses to both questions is the score presented here.

Broadband coverage and speeds

In March 2017 the UK Government introduced the Universal Service Obligation (USO) for broadband as part of its commitment in the UK Digital Strategy to ensure that the UK has world-class digital connectivity and inclusion.

| Measure	Wheldrake	York	Summary
Average download speed (Mb/s)	46.02	177.50	slower than the York average
Superfast broadband availability	79.65%	96.17%	worse than the York average
Connections receiving:			
slowest speeds (under 2 Mb/s)	0.00%	0.04%	lower than the York average
slower speeds (under 10 Mb/s)	2.52%	0.67%	higher than the York average
superfast speeds (over 30 Mb/s)	90.27%	96.32%	lower than the York average

This data is based on analysis of Ofcom's Connected Nations data for 2022/2023. Ofcom collected and analysed data from major fixed telecoms operators (BT, Virgin Media, Sky, Talk Talk, Vodafone and KCOM).
Due to variations in broadband performance over time, Ofcom cautions that the data should not be regarded as a definitive and fixed view of the broadband infrastructure but rather a snapshot of current variation in availability and performance across the country.
The vast majority of UK homes can now get superfast broadband, which provides download speeds of at least 30 Mbit/s; although more than a quarter who have access to it have not taken it up.
