Poverty

Child Poverty

The proportion of children living in families in receipt of out-of-work (means-tested) benefits or in receipt of tax credits where their reported income is less than 60 per cent of UK median income.

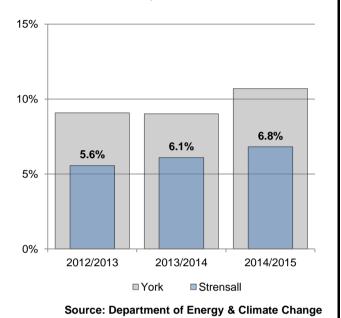

Fuel Poverty

The Low Income High Costs indicator is a twin indicator consisting of:

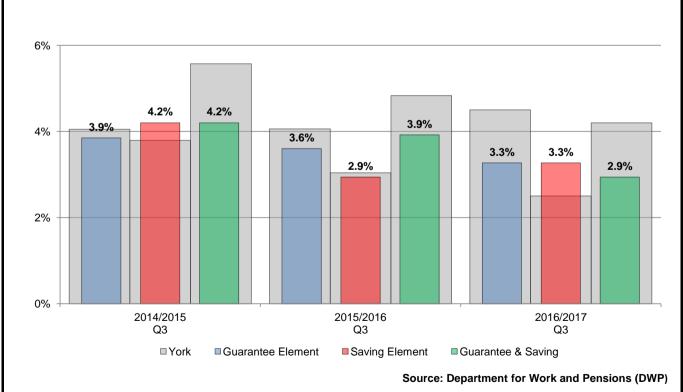

- the number of households that have both low incomes and
- the depth of fuel poverty amongst these fuel poor households.

 This is measured through a fuel poverty gap which represents the difference between the required fuel costs for each household and the median required fuel costs.

Pension Credit

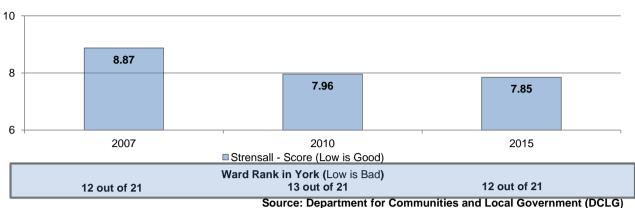

Pension Credit is an income-related benefit made up of 2 parts - Guarantee Credit and Savings Credit.

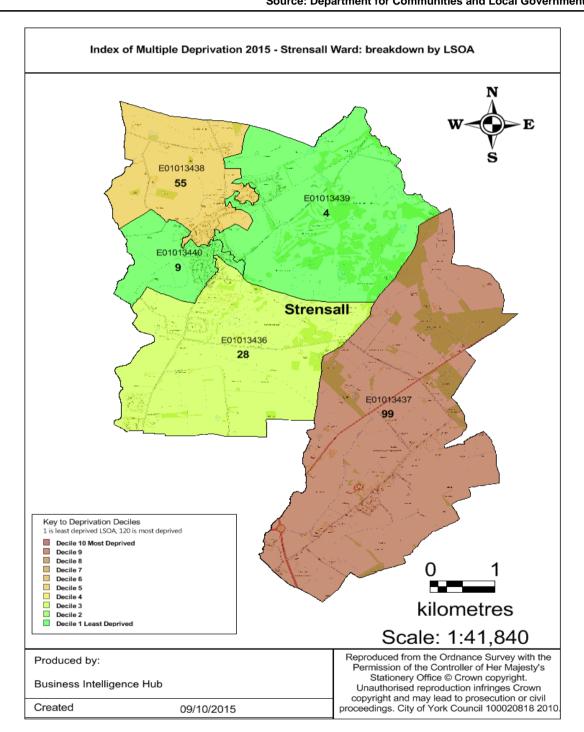

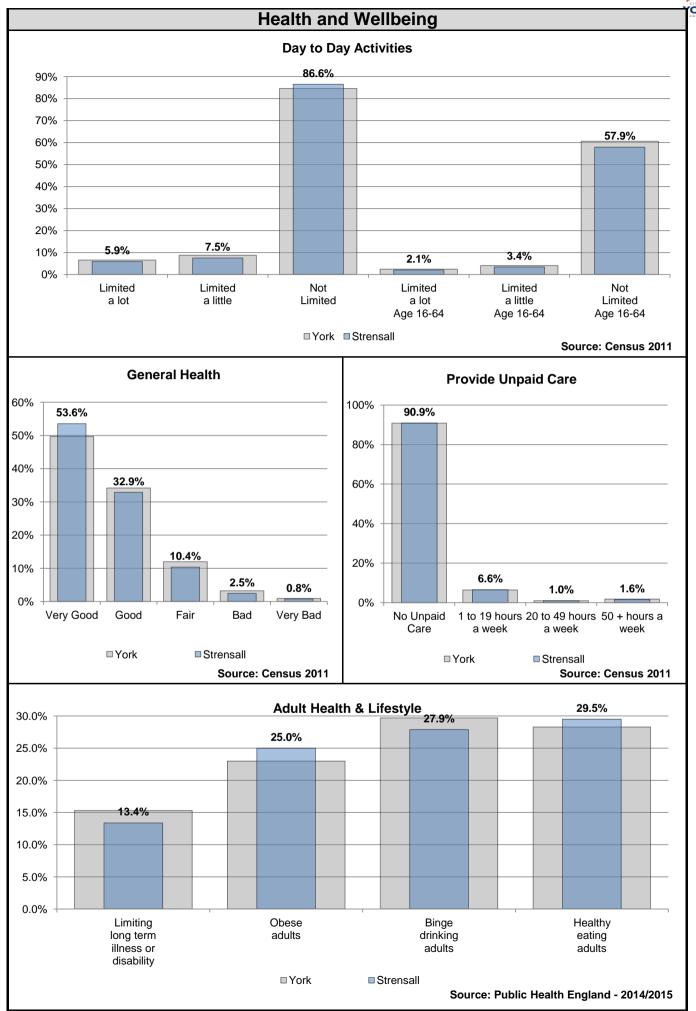

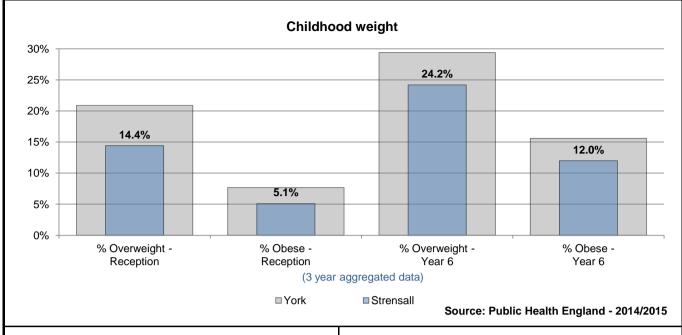

The IMD measures and rates a number of different domains affecting quality of life including income, employment, education and skills, health and disability, crime, barriers to services and quality of living environments.

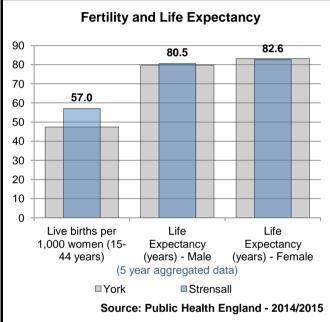

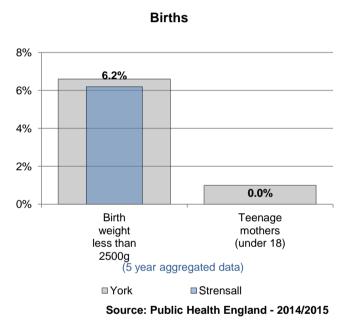

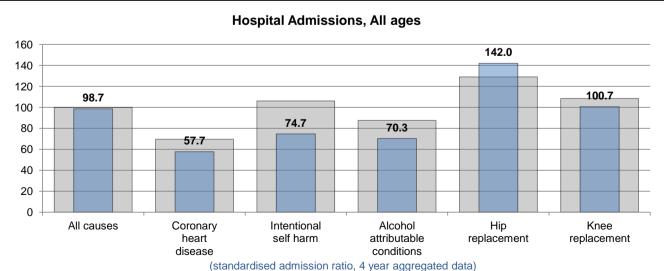

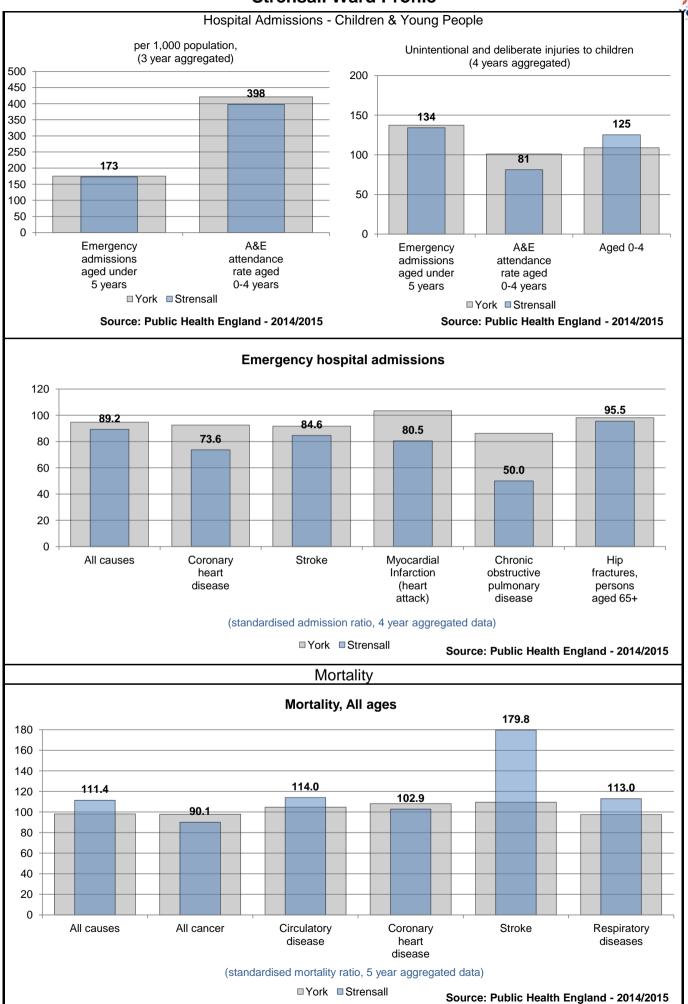

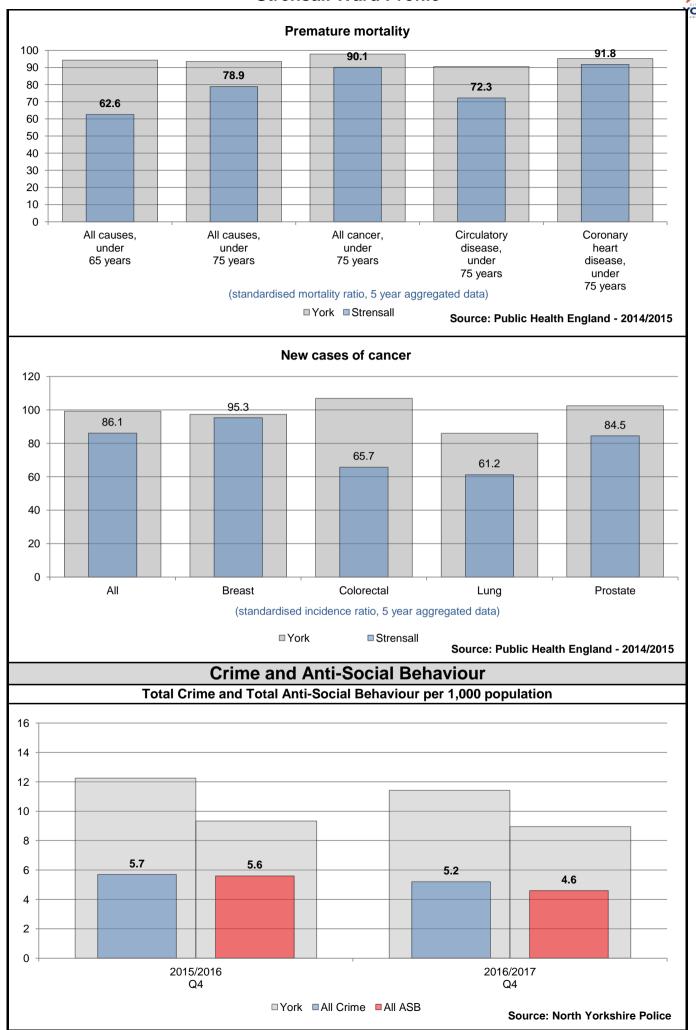

Hospital Admissions

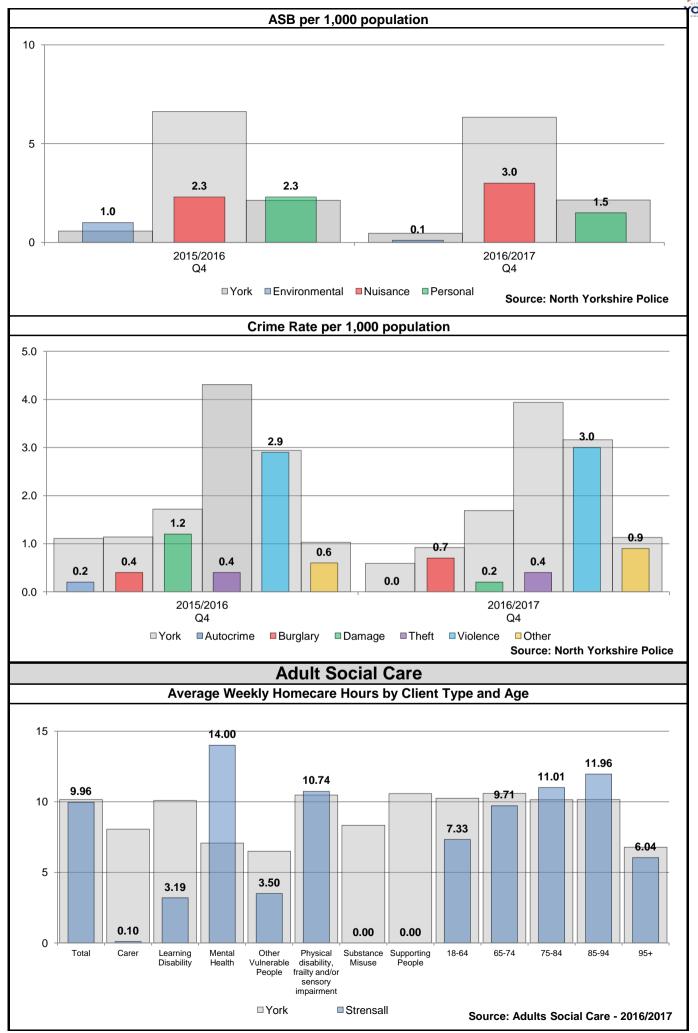

The Standardised Admission Ratio (SAR) is a summary estimate of admission rates relative to the national pattern of admissions and takes into account differences in a population's age, sex and socioeconomic deprivation.
