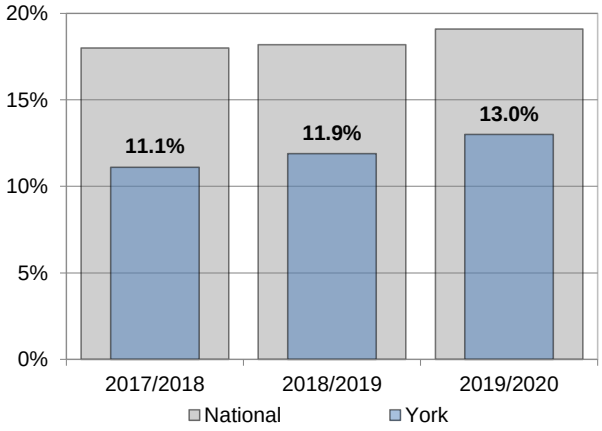
Poverty

Child Poverty

The proportion of children (under 16) who are living in families whose reported income is less than 60 per cent of UK median income

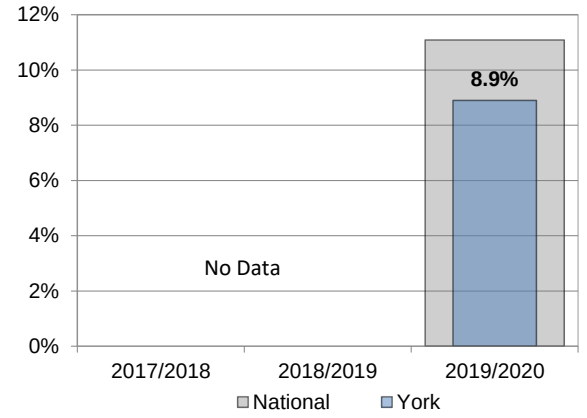


Source: HM Revenue & Customs

Fuel Poverty

The new fuel poverty metric Low Income Low Energy Efficiency (LILEE) considers a household to be fuel poor if:

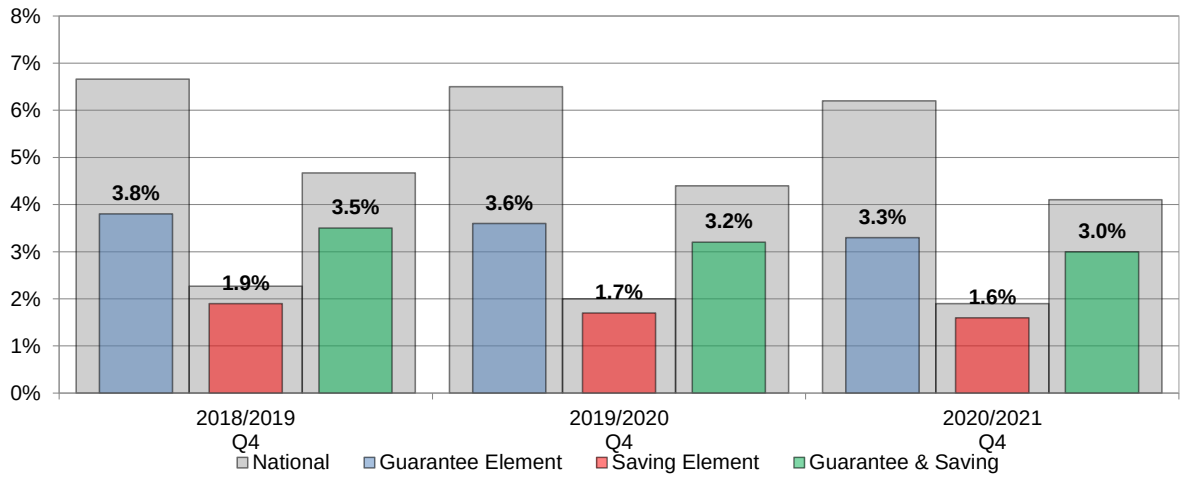
- it is living in a property with an energy efficiency rating of band D, E, F or G; and
- its disposable income (income after housing costs (AHC) and energy needs) would be below the poverty line.



Source: Department for Business, Energy & Industrial Strategy

Pension Credit

Pension Credit is an income-related benefit made up of 2 parts - Guarantee Credit and Savings Credit.



Source: Department for Work and Pensions (DWP)

Indices of Multiple Deprivation

The IMD measures and rates a number of different domains affecting quality of life including income, employment, education and skills, health and disability, crime, barriers to services and quality of living environments.

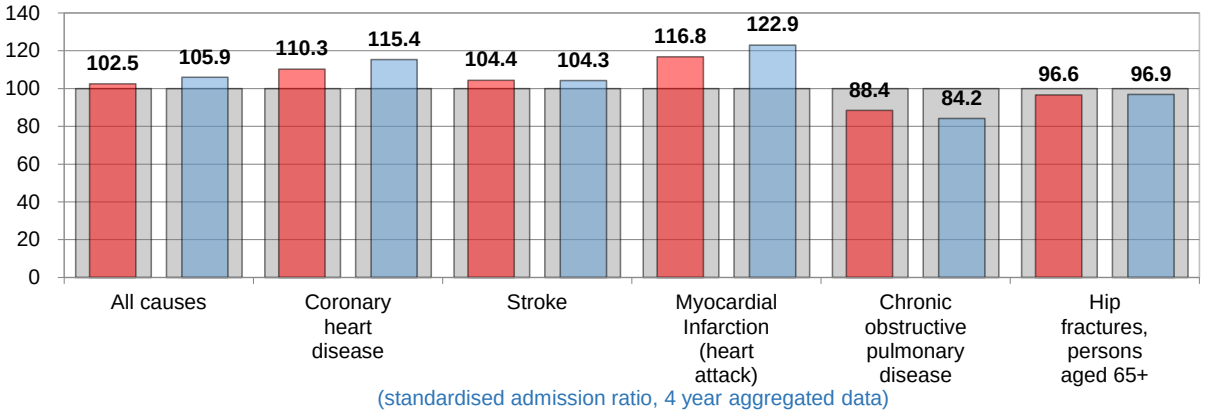
Emergency hospital admissions



(standardised admission ratio, 4 year aggregated data)

The Standardised Admission Ratio (SAR) is a summary estimate of admission rates relative to the national pattern of admissions and takes into account differences in a population's age, sex and socioeconomic deprivation.

National | York - 2017/2018 | 2019/2020

Emergency hospital admissions for injuries resulting from a fall (over 65), per 1,000 population

Falls data: the figures given here are taken from Hospital Episode Statistics data, which takes the number of those aged 65 or over being admitted to hospital on a non-elective basis at least once in each year as a result of a fall and divides it by the number of those of that age group resident in each ward to give a rate per 1,000 population.

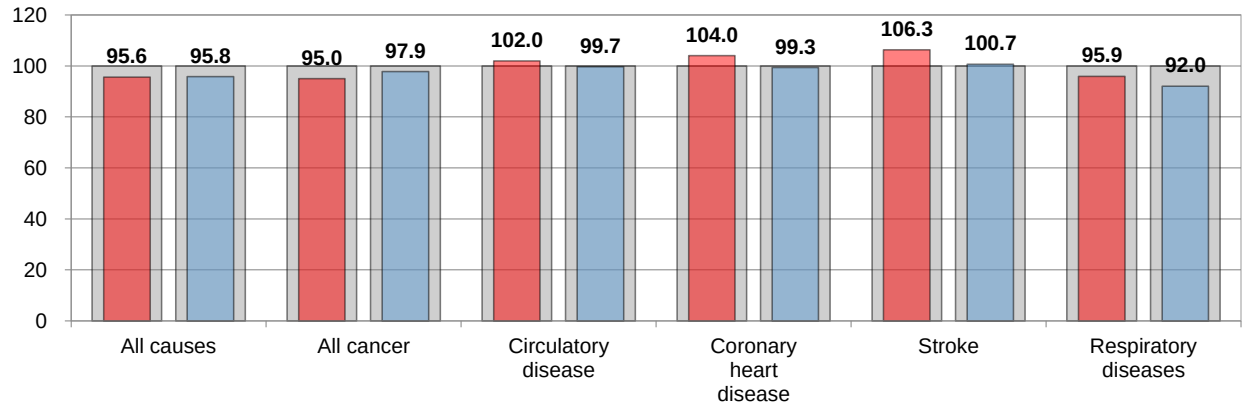
York Profile

Mortality

Mortality, All ages



(standardised mortality ratio, 5 year aggregated data)

The standardized mortality ratio or SMR, is a quantity, expressed as either a ratio or percentage quantifying the increase or decrease in mortality of a study cohort with respect to the general population.

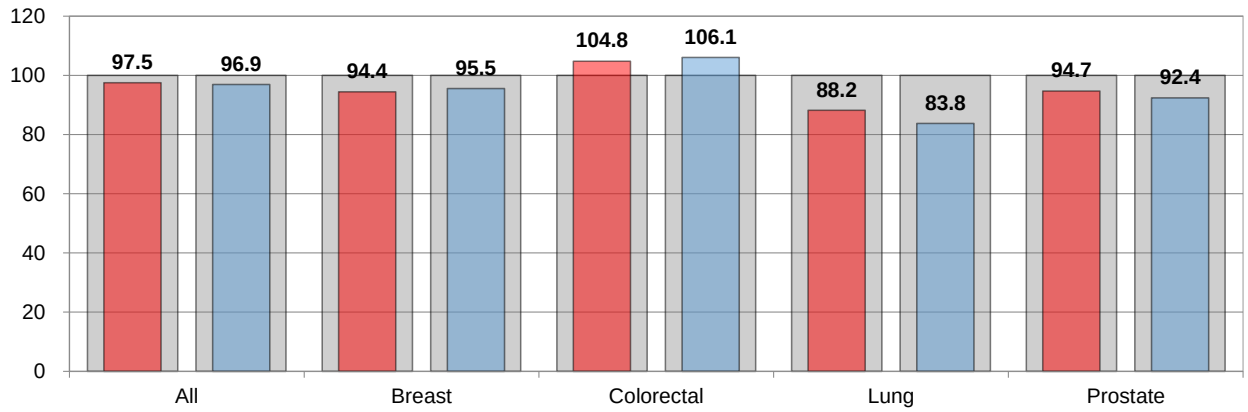
New cases of cancer



(standardised incidence ratio, 5 year aggregated data)

The standardized incidence ratio (SIR) is an estimate of the occurrence of cancer in a population relative to what might be expected if the population had the same cancer experience as some larger comparison population designated as “normal” or average.

Broadband coverage and speeds

In March 2017 the UK Government introduced the Universal Service Obligation (USO) for broadband as part of its commitment in the UK Digital Strategy to ensure that the UK has world-class digital connectivity and inclusion.

Measure	York	National	Summary
Average download speed (Mb/s)	147.10	68.92	faster than the National average
Superfast broadband availability	94.13%	94.91%	worse than the National average
Connections receiving:			
slowest speeds (under 2 Mb/s)	0.04%	0.28%	lower than the National average
slower speeds (under 10 Mb/s)	0.81%	1.44%	lower than the National average
superfast speeds (over 30 Mb/s)	93.35%	92.75%	higher than the National average

This data is based on analysis of Ofcom's Connected Nations data for 2020/2021. Ofcom collected and analysed data from major fixed telecoms operators (BT, Virgin Media, Sky, Talk Talk, Vodafone and KCOM). The availability data also includes coverage information provided by alternative network providers (B4RN, BU-UK, City Fibre, Gigaclear, Hyperoptic, ITS and Relish). Due to variations in broadband performance over time, Ofcom cautions that the data should not be regarded as a definitive and fixed view of the broadband infrastructure but rather a snapshot of current variation in availability and performance across the country. Due to privacy concerns Ofcom did not present the information in postcodes with fewer than four broadband connections.
